Electronics Furniture Office Supplies

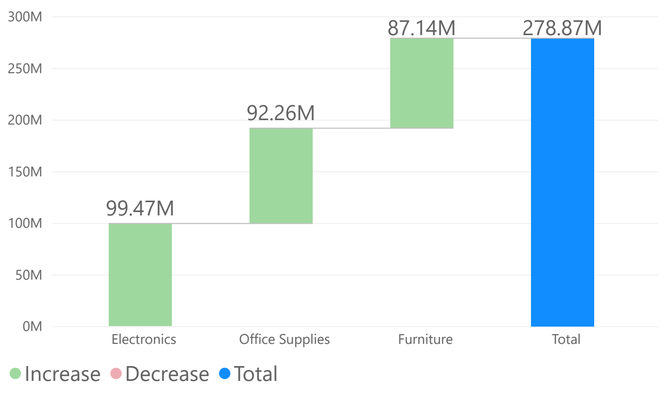

State: All

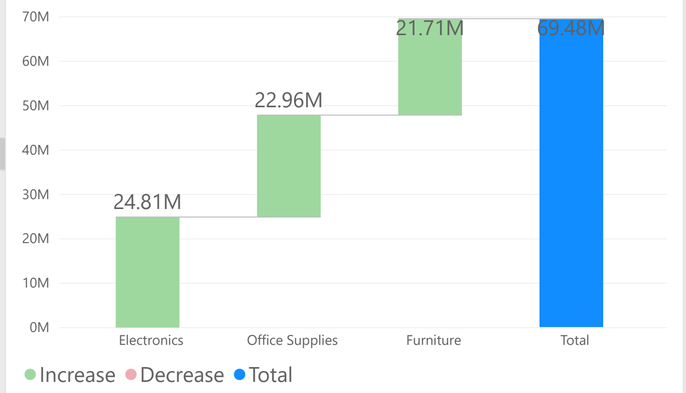

Total Revenue	Total Orders	Total Profit	Total Units	Profit Margin
278.87M	100K	69.48M	551K	24.92%

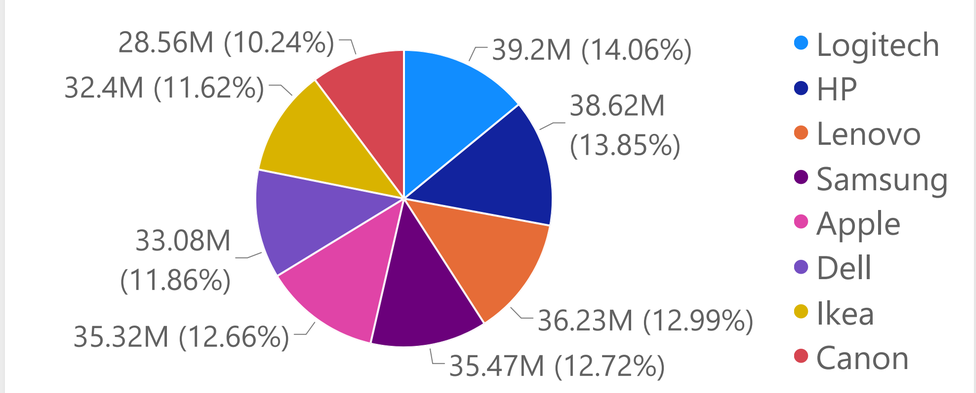

Key Insights

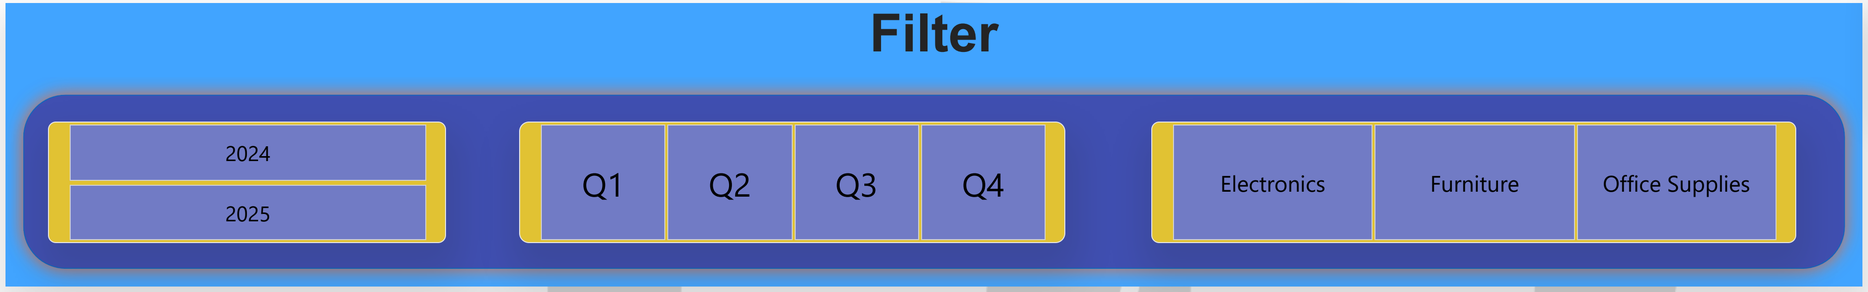

2025 revenue is 138.9M vs 140.0M in 2024 (-0.8%), and profit is -0.9%. Orders are identical (50,000 each year). Quarterly revenue is flat (34.1–35.3M). Logitech is the top brand at 14.1%, with Canon the lowest at 10.2%.

Insights & Recommendations — what should we do?

Revenue YoY

-0.8%

2025: 138.9M vs 2024: 140.0M. Profit is -0.9%. Orders identical (50,000 each).

Feb 2025 vs Jan 2025

-13%

Shortest month, and revenue per day is about 4.6% below Feb 2024. Prices and discounts were normal.

Margin vs discount

32.2% to **15.8%**

Margin at 0% discount vs 20% discount. Discounts cost 31.1M of profit.

Loss - Making Orders

2,819

All at the 20% discount level (about 14% of those orders).

Best vs worst state

5.2%

Delhi 28.5M vs Telangana 27.1M. Geography is evenly spread.

Recommendations

- **Cap discounts at 15%.** About +3.1M profit if order volume holds (see the what-if card on Profitability).
- **Review the 20% tier.** 14% of those orders lose money. Add an approval rule above 15%.
- **Investigate February volume.** Compare orders per day and campaigns across both Februaries.
- **Focus on category mix, not geography.** Furniture is lowest in every state.

Data notes

- Data looks synthetic and evenly generated (states, segments, discount tiers all near-equal).
- Currency assumed to be rupees; the data has no currency column.
- Brands appear in several categories (for example Ikea under Electronics).
- Two years only: Jan 2024 to Dec 2025, 100,000 orders.

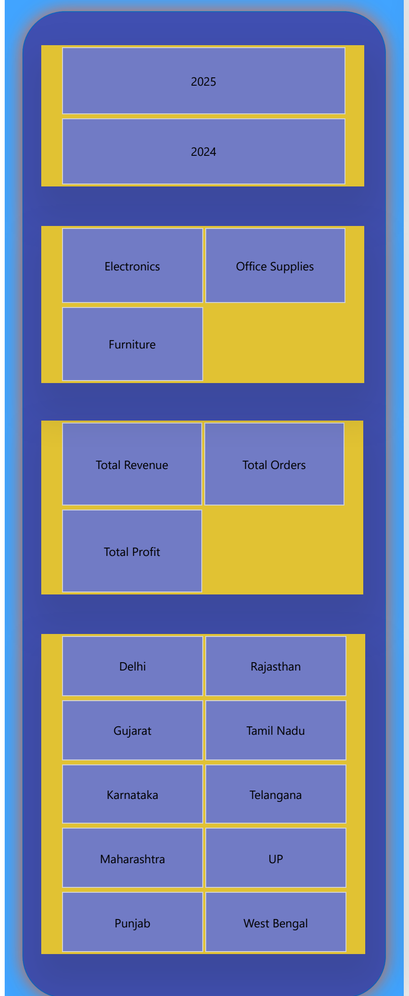

Questions this dashboard answers

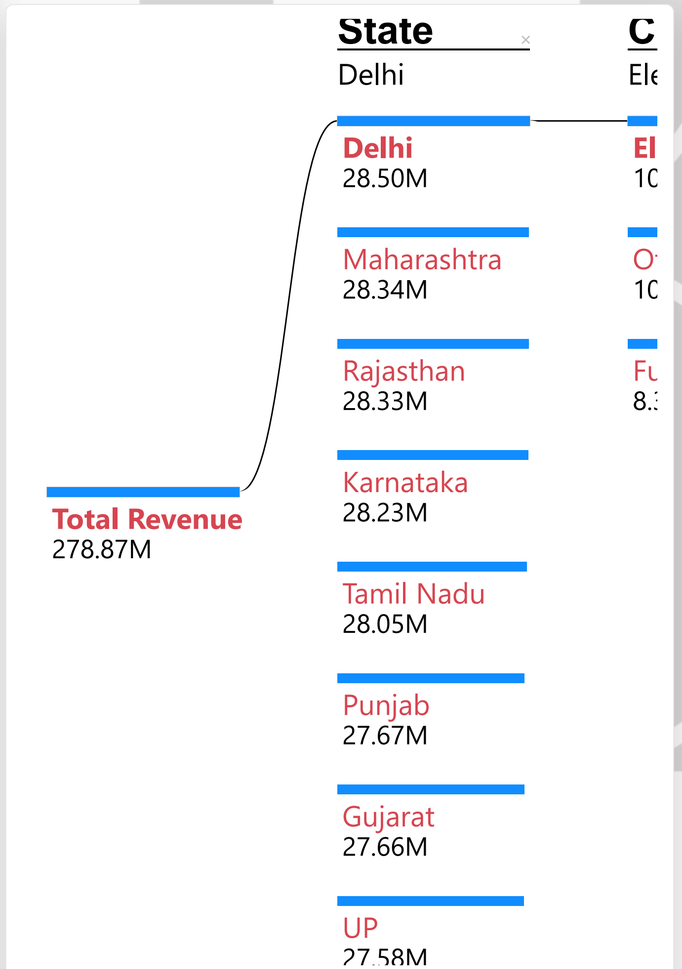

- Is the business growing? Where do we lose margin?
- Which states, products and customer cities lead?
- What happens to profit if discounts are capped?

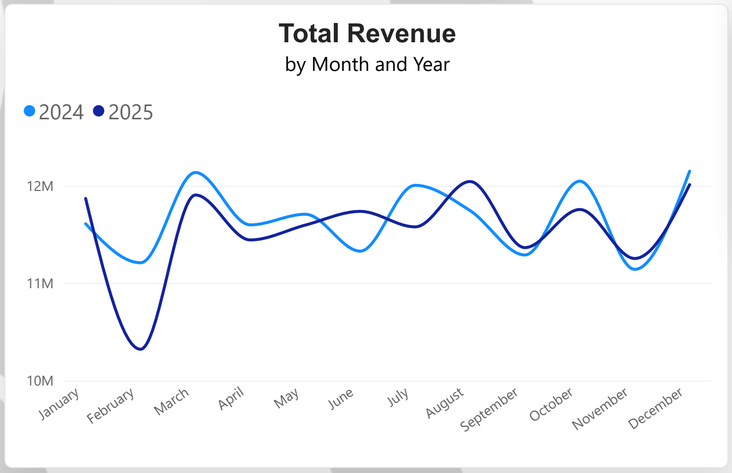

Sales Analysis - how is revenue trending vs last year?

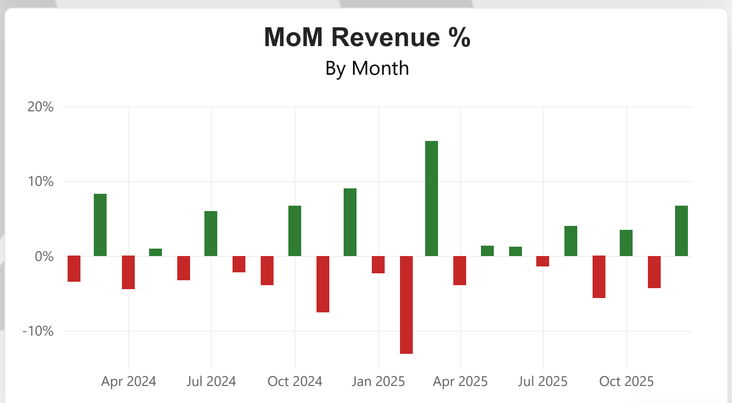

Revenue/Unit	Revenue YTD	MoM Revenue %	YoY Profit %	Profit LY
506.56	139M	6.73%	-0.94%	34.91M

Filter

February 2025 fell 13% month over month (a short month, with about 5% fewer orders per day), followed by a +15% rebound in March.

Key Insights

The Feb 2025 dip (10.32M) is mostly calendar plus volume: February is short, but revenue per day was also about 4.6% lower than Feb 2024 (3,742 orders vs 3,974). Average order value (2,759) and discount (9.9%) were normal, so this isn't a price issue. Best month is Dec 2024 (12.15M). Add a "Revenue per day" measure to separate the calendar effect.

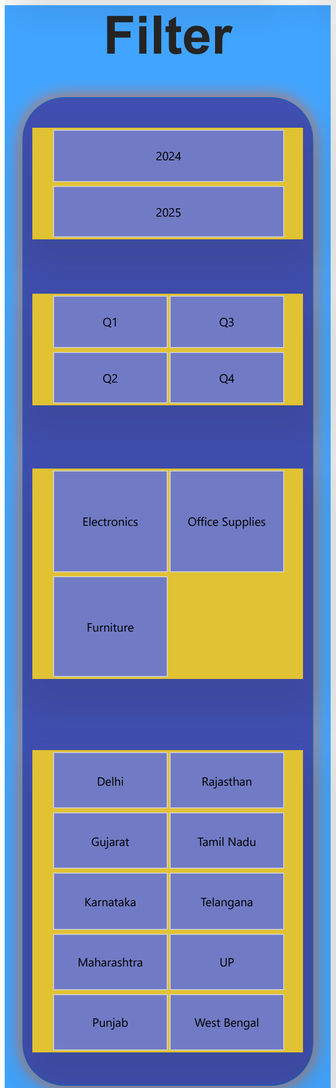

Monthly Revenue: 2024 vs 2025 (₹ M)

Month	2024	2025
January	11.61M	11.87M
February	11.21M	10.32M

Revenue vs Average by State (%)

Key Insights

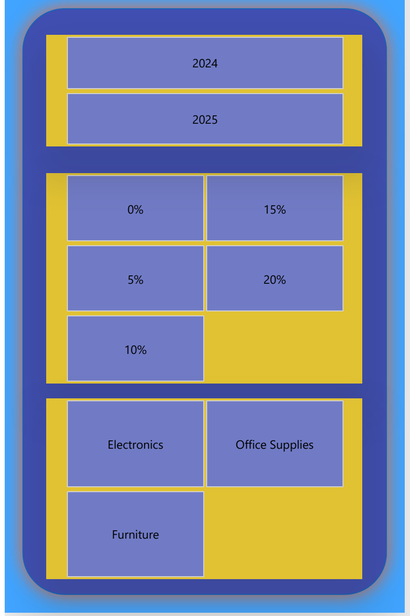

Delhi leads on revenue (28.5M) and margin (25.3%). Telangana is lowest (27.1M). The gap is only 5.2%, so performance is evenly spread. Furniture is the lowest category in every state. Pune is the top customer city (30.0M) and Jaipur the lowest (26.5M).

Product 1	Furniture	Samsung	1.53M	23.37%	9.61%
Product 166	Furniture	Dell	1.34M	23.39%	10.53%
Product 195	Office Supplies	Lenovo	1.65M	23.45%	10.77%

Key Insights

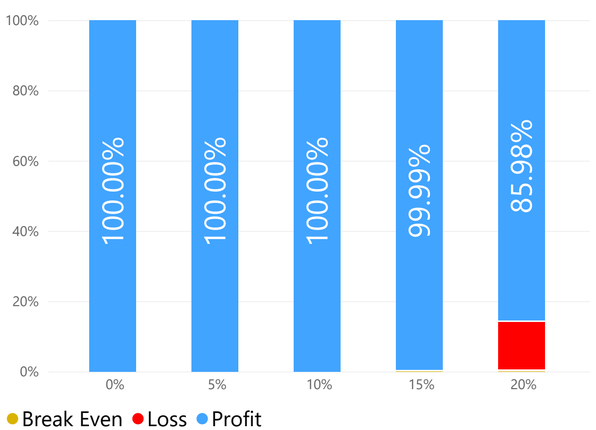

Margin falls from 32.2% (no discount) to 15.8% (20% discount). Discounts cost 31.1M, about 31% of potential profit. All 2,819 loss-making orders are at the 20% tier. A 15% cap would add about 3.1M if volume stays the same. Loss rates are similar across price tiers (about 2.5–3.2%), so the issue is discounting, not price.
